

PROPERTY RESTORATION NOTICE

On _____ / _____ / _____,

We completed the underground portion of the natural gas service work on your property. Temporary restoration of the yards and landscaped areas will be completed within approximately 5 business days. We will make every effort to restore the area to its original condition. You will need to water landscaping as needed.

We also have made temporary repairs to any hard surface areas impacted by our work (i.e. driveway, sidewalk, street), which will be maintained until final and permanent hard surface restoration is performed. Another Washington Gas contractor will complete the permanent repairs, within 8-12 weeks, weather permitting, after all work has been completed in compliance with local regulations.

Public sidewalks and roadways will be temporarily patched and the permanent restorations will follow the completion of the project and will meet the state or local Department of Transportation specifications. Final restoration should be completed within 8-12 weeks. Please note permanent restorations may be delayed as paving operations are limited by weather conditions.

If temporary restorations are not made to your satisfaction, please contact the person below, a third-party contractor working on behalf of Washington Gas, at:
